

How we are funded

The cost of providing all our patient care and support services at both the adult and children's hospices is expected to be just under £5 million this year.

Although this is essential healthcare, Keech Hospice Care only receives around a quarter of its income from statutory sources, leaving the remaining 75% to be raised independently.

Our main source of funds come from:

- voluntary donations and fundraising activity by individuals and groups within our community
- donations from corporates and employee fundraising
- charitable trusts
- legacies
- our charity shops
- the Keech Hospice Care lottery

We are grateful to all the people and organisations that support us – without them hundreds of local people coping with incurable conditions would no longer receive the care and support they deserve.

If you would like to support our work, please see the links on the right for how you can get involved or make a donation. You can also download a short guide to our hospice services and how you can help opposite.
