

## Foreign coin collection

When returning from a business trip or holiday many of us find we have a few foreign coins leftover but not usually enough to warrant a trip to the exchange counter.

However, if enough people collect such coins and send them to us at Keech Hospice Care, it definitely is worth our while to get them converted into sterling.

We can exchange any foreign coins, old or new, and put the money to good use in supporting our work at our hospices. That's got to be better than having them clutter up your draws at home.

To organise a collection at work

Simply get in touch and we'll send you one of our collection pots. When your collection is completed you can either bring the money in to us at the hospice or take it to one of our charity shops and we'll do the rest.
