# Statement of Purpose

(incorporating our Philosophy of Care)

## Purpose

**Our purpose is to lead the way in providing excellent care, supporting children and adults with life-limiting conditions and those affected by death and dying, helping them to live well and make every day count.**

We aim to give the most appropriate care and support to our patients; to assist in the relief of their physical and emotional suffering; and to help them lead a purposeful and fulfilling life.

We will offer a well-coordinated, multi-professional and 'seamless' service, which integrates hospice specialist palliative care services with primary, secondary and tertiary health care services, other voluntary/independent agencies, social services and, in the case of children and young people, education services.

Our approach will be non-judgemental and non-discriminatory, ensuring equal access for all. We consider it equally important to give support to those who care for our patients, whether they are professional carers, members of the family, friends or trained volunteers. We work with our communities to develop resilience at end of life and beyond.

We aim to use our expertise to benefit the community we serve. This includes promoting conversations about death and dying within communities, so normalising the process and helping people to communicate their wishes. We also provide training to health and social care professionals. We take the lead or work in partnership to spearhead research and innovation within our specialist field.

Registered provider: Keech Hospice Care, Great Bramingham Lane, Luton LU3 3NT

Registered managers: Liz Searle, Chief Executive Officer, RN, RNT, MSc, MBA, Cert.Ed;  
Elaine Tolliday, Clinical Director, RGN, BSc, PGCE.

Registered regulated activities: Personal care; Treatment of disease, disorders or injury.

## Responsibility towards patients, relatives and friends

We will treat patients, families and friends as individuals, with compassion, humility, honesty and respect. We will listen to them and, whenever possible, involve them in decisions about treatment. We will respect their preferences, beliefs and customs, and assure their complete privacy and dignity at all times. We will always take account of the needs and wishes of patients at the different stages of their illness. We will provide a varied menu to ensure the cultural and dietary needs of our patients are met.

There is no charge to patients or their families for the use of our services.

## Other responsibilities

The community generously contributes a great deal of money, time and effort to sustain the work of our hospice charity. We must at all times act with integrity and demonstrate we are a trustworthy organisation by using these resources wisely, prudently and effectively.

## How are we funded?

We raise funds through generous donations from our local community and the sale of donated goods in our charity shops. In addition, a funding contribution is made by the NHS and local authorities.

## Adult patient unit (8 beds)

The adult in-patient unit is a purpose-built and comprehensively staffed unit with an emphasis on homely surroundings. It opened in 2009 and is fully accessible for wheelchair users and those with disabilities. Trained nurses, who specialise in palliative care, and health care assistants (HCAs) provide care, supported by specialist doctors, social workers, therapists (music, art, talking, complementary, physio and occupational), bereavement care staff and trained volunteer helpers.

The unit's function is to provide care for those patients whose distressing symptoms and other complex needs are not readily relieved in the home or other care setting. Its focus is on symptom control, psychological support and end-of-life care. The patient's needs determine the length of stay. Staff use an evidence-based assessment model to plan care that is individually tailored to the needs of the patient and their family.

Accommodation is provided for eight patients in eight single rooms (all en suite). The charity designed the environment to look as relaxing and homely as possible, while all the latest medical and nursing equipment is discreetly available and used to provide a high standard of specialist care. All our care staff follow a professional code of conduct and we offer a high staff-to-patient ratio. This ensures the best quality treatment and personalised care for the patient, their family and friends.

All patients receive a medical and nursing assessment on admission, during which we will identify and agree with the patient what their treatment aims are. The medical and nursing teams regularly monitor these aims until the patient achieves them.

Please contact the hospice for up-to-date visiting guidelines.

# Adult Service

**Our adult service provides specialist palliative care to individuals over the age of 18 who have a progressive, life-limiting condition and have a GP in the Luton and central Bedfordshire area.**

## Wellbeing Centre

Our Wellbeing Centre works alongside patients with a progressive palliative diagnosis to understand their needs and support them to achieve their goals so they can live well independently. Our specialist multi-disciplinary care team puts patients at the centre of everything we do, with a holistic approach to help patients live well for as long as possible. The earlier a patient is referred to us, the better we can support them with their complex condition; while attending, the patient remains under the care of his or her GP and community nursing team.

The Wellbeing Centre is wheelchair accessible and suitable for people with disabilities and impairments, with facilities for more dependent patients.

The Wellbeing Centre has been assessed and modified to ensure it is COVID secure, making sure even the most vulnerable patients can access services, if required.

Our specialist team comprises specialist doctors and nurses, health care assistants (HCAs), therapists, family support workers, social workers and trained volunteer helpers. Chaplaincy support is available to patients and families of any faith or cultural background.

Patients, and their families, benefit from a personalised package of care and support which is delivered both virtually and within the centre.

## My Care Co-ordination Team

Based at the hospice, My Care Co-ordination Team (MCCT) provides a single point of access for co-ordinating care packages for Luton adults who have palliative care needs.

MCCT works with the Luton and Dunstable Hospital, GPs, community nursing teams and social care providers to ensure patients receive the support they need and that care packages respond to any changes in patients' needs.

A key feature of this service is the Luton Care Co-ordination Caseload (LCCC). The caseload contains information about patients' preferences and wishes, and this is used to ensure patients receive individualised care in the place they want it.

The team is available Monday to Friday from 8am to 5pm, and Saturdays, Sundays and public holidays from 9am to 5pm.

## Hospice at Home Volunteers (for the Luton area)

The Hospice at Home service coordinates trained and supervised volunteers to provide informal support to patients, their families and carers either virtually or in their own home. Offering on average two hours a week, the volunteer delivers a befriending service that is unique to each patient and family. An employed and trained coordinator assesses the needs of the patient and then arranges for a specific volunteer to provide support to that patient.

# Children's service

**Our children's service provides specialist palliative care for infants, children and young people, who have a life-limiting condition and who live within Bedfordshire, Hertfordshire and Milton Keynes. The service is available to them up to their 19th birthday.**

## Children's in-patient unit (five beds)

The children's in-patient unit is purpose built and opened in 2000. Children are admitted for symptom management, step-down stays or short breaks. If a child and family wish it, the hospice can be their preferred place of care at the end of life.

There are four single-occupancy bedrooms and one double-occupancy bedroom used for siblings, if required, plus accommodation for families. It is fully accessible for wheelchair users and those with disabilities. The unit is staffed by experienced children's nurses and health care assistants, supported by specialist doctors, social workers, therapists and trained volunteers.

Facilities at the hospice include a hydrotherapy pool, multisensory room, computer area, safe play area and outdoor play areas. Relatives, friends and health care professionals can visit the child at all times.

## Play and activity services

Our play and activity services provide specialised play and educational activities for children. The service is offered on a short-term, outcome-related basis, and is available as sessions or a course. These sessions are offered virtually, at home or within our COVID-secure day area.

For children with a life-limiting condition under the age of five and their parents or carers, the hospice runs a social 'stay and play' session called Tots 'n' Toys. This group, which provides families with specialist palliative care support, also enables them to interact with other families who are experiencing similar circumstances. This service is facilitated by a play specialist, palliative care nurse and health care assistant.

The specialist palliative care provided by the children's in-patient unit and play and activity services includes helping to control the child's symptoms, giving them access to a range of complementary therapies, and providing emotional support for both the child and their family.

## Children's community team

The children's community team began in 1998 and provides hospice care to children with a life-limiting condition in various community settings: the family home, the child's school or in hospital. The team comprises experienced children's nurses and palliative care support workers.

The care offered by the community team varies according to each family's individual needs and is provided both virtually and in person.

### Typically, it will include:

- **helping with symptom management**
- **administering medication or offering another form of treatment or therapy**
- **providing practical and emotional support to the whole family**
- **accompanying the family on hospital appointments**
- **liaising with other agencies involved in the child's care**
- **giving advice and information about the child's condition, their care or social welfare.**

Should the family wish for their child to die at home, the community team will offer them as much support as they need in partnership with other agencies (such as NHS and social care).

# Shared services for adults and children

## 24 hour advice lines

Keetch Hospice Care has two dedicated 24-hour advice lines: one for adult support and one to support families who have a child with a life-limiting condition. Both advice lines give access to experienced palliative care nurses who can advise on symptom control or provide emotional support. They also offer specialist guidance to health and social care professionals.

**Adult advice line: 0808 180 7788**

**Children's advice line: 0800 035 6497**

## Medical Team

The charity employs a team of associate specialist doctors covering both adult and children's services. The team consists of full-time and part-time doctors, specialising in adult palliative care, and paediatricians specialising in children's palliative care. The team work closely with the local GPs and hospital consultants.

## Understanding Sepsis

Mark Pedder

## Music, art, talking and complementary therapy

These services are available to patients, carers and family members. The services are tailored to individual needs and offered virtually or in person within the Wellbeing Centre and music room.

## Hydrotherapy pool

A hydrotherapy pool is very different to a general public swimming pool. It is carefully designed to cater for the needs of people of all disabilities and can be used by people of all ages. For our child patients, the pool provides sensory stimulation and relaxation as well as family time together.

The hospice pool is available to patients and their families as well as people in the local community who have medical conditions, disabilities or additional needs. Our 16.5m by 7m pool is heated up to 35°C (warmer than the usual 29°C) and equipped with hoists and ramps.

The pool is managed by a senior lifeguard, with the support of an administrator and volunteer lifeguards.

## Education, training and research

The clinical education team comprises a practice development lead, two lecturer practitioners and a training officer. We offer a range of in-house training, and palliative and end-of-life care training to health and social care professionals in our local area. Training can be offered within the place of work or virtually.

Health professionals can also come here on placement to develop skills and knowledge in palliative care.

In partnership with University of Bedfordshire, we are involved in research which will provide vital information to influence service development for us, local health-care providers and commissioners.

## Social work

Our social work team comprises social workers and social work assistants who support patients, carers and families across our whole service, offering social, emotional and practical support.

They give a wide range of advice on (but not limited to) benefits, finances, practical services, housing, holidays and applying for grants for necessary specialist equipment. They can direct patients and families to resources to help them with creating legal documents such as Lasting Power of Attorney or Wills. They also support patients discharged from our in-patient units to go home or to a suitable care placement, and help with funding applications for ongoing care and support.

The team underpins safeguarding within Keech Hospice Care, as ensuring the health and welfare of those using our services is paramount. If there are concerns, they are addressed via our Safeguarding Policy. Our social work team also supports people who do not have capacity through the Deprivation of Liberty process.

They work with a wide range of professionals within social services and health services, advocating and supporting patients. They can also provide support for patients when talking to employers, schools and other services.

Across Keech Hospice Care, they support families and carers via family coffee mornings and a carers' drop-in group where carers gain support from those experiencing similar pressures. Members of our social work team can also work one to one with individual carers and complete assessments of carers' needs.

## Bereavement Support

The charity offers bereavement support to all members of the family referred to us across both services. It is appropriate to their individual needs and for as long as they may need it.

Our family support workers will help the family deal with the practical matters that follow a death, such as registering the death and arranging the funeral, as well as offering emotional care and support during these final difficult days.

Over the months or years ahead, families can receive continuing support through a range of bereavement services and events, including one-to-one support, support groups and remembrance events.

## Outreach Bereavement Services

Bereavement support is offered to any adult in Bedfordshire who is bereaved due to the expected death of an adult. No previous access to Keech Hospice Care services is required.

## User involvement

We encourage feedback from people who use our services to help us ensure we deliver the best possible service. We regularly canvass and consult users for their opinions and suggestions via our patient information leaflets, regular audits of services, questionnaires, comment forms, focus groups and external inspections. There is a comprehensive complaints and suggestions procedure for any user/stakeholder to use to help us improve our service. Our trustee board includes people who represent the views of service users.

### Summary of complaints procedure

Complaints may be initiated with front-line staff and will be dealt with sensitively. They may be made verbally or in writing; they may be formal or informal. All complaints will be acknowledged, investigated without prejudice and responded to. If you are not satisfied with the resolution we provide, you can raise your concerns with a relevant adjudicator, such as an ombudsman or regulator.

We will always follow our Complaints Policy and Procedure, available on request by contacting the head of quality and governance on 01582 492339.

### Who regulates our service

The Care Quality Commission (CQC) is responsible for regulating and inspecting voluntary and private health care organisations.

For a copy of our most recent inspection report, please contact the chief executive officer at the hospice or the Care Quality Commission itself at the address below:

**Care Quality Commission, Citygate, Gallowgate, Newcastle upon Tyne, NE1 4PA.**  
**Tel: 0300 061 6161 - Email: [enquiries@cqc.org.uk](mailto:enquiries@cqc.org.uk) - Website: [www.cqc.org.uk](http://www.cqc.org.uk)**

# Patient and Family Charter

You can expect a clear explanation of your condition and any treatments proposed for you – including the right to be referred for a second opinion.

You have the right to be referred to a health professional who you consider to be acceptable.

You have the right to refuse treatment or aspects of treatment. Your decision will be respected and will not compromise the quality of care you receive.

You have a right to see what records we hold about you. If you wish to request access to your records, please see the 'Right to access' section of our Privacy Policy, available on our website.

Your personal information will be kept confidential and safe. Our Confidentiality Policy and Procedure explains under what circumstances we will share this information with others.

You may choose whether to take part in clinical staff training.

You may choose whether to take part in research.

You may be asked to support the hospice with publicity through case studies; you can choose whether you wish to take part in this or not.

You can expect all the staff and volunteers you meet face to face to wear name badges and introduce themselves.

You can expect the hospice to respect your privacy, dignity, and religious and cultural beliefs at all times and in all places. For example, meals will suit your dietary and religious needs. Staff will ask you whether you

want to be called by your first or last name (with title) and respect your preference.

You can ask to see an up-to-date chart of our organisation management structure by contacting the head of HR on the number below.

If you would like this information in another language, large print, audio tape/CD or other formats, please contact the hospice on the number below.
